Re: Rubb Ref # 05012

Dear Michael Carter,

As you requested I am furnishing you a quotation for the metal cladding leaks and vent hood repair on your Rubb building. During my analysis on 8/20/2018, we observed the building together pointing out that the metal cladding was rusted through in several locations on the bottom of the side panels, as well as the special sealing angle/sill. During the walk thru, we also acknowledged that there were also a couple panels damaged from being hit on the front gable. We also observed that the fan hoods had been damaged and will need new vent supports. The bottom angle steel on the roller shutter door has been compromised and will need added bolts to secure. It is assumed that Eimskip will provide a dumpster during the repairs. Listed below is a breakdown of the mentioned repairs;

Equipment:

Scissors lift (\$258.48 daily rental)	\$516.96
---------------------------------------	----------

Hardware:

Metal Cladding/Special Base Sill/Special Base Sealing (Roman Blue)	\$2,845.30
Butyl sealing tape	\$ 30.00
M1 Sealant Caulking (\$10.50 ea.)	\$ 21.00
Exhaust Fan Supports (\$21.98ec.)	\$43.96
Hardware for Roller Shutter door angle	\$10.00
Vent Support (2 @ \$44 ea.)	\$88.00

we will never stop innovating
